

BUZZ OFF PEST PREVENTION

WEBSITE CARE & GROWTH SUBSCRIPTION

Prepared for Hayley & Veronnica

Everything you need to keep the site running, ranking on Google, and turning visitors into calls. One simple monthly subscription covering hosting, security, SEO, content, and email infrastructure.

\$79/MO

Month-to-month

No contract · Cancel anytime

100% plant-based pest prevention deserves a website that works just as hard as you do.

1 HOSTING & SITE HEALTH

- **Vercel hosting** — fast, global, 99.99% uptime
- **Next.js framework** & dependency updates
- **Quarterly backup verification**
- **Broken link monitoring**
- **SSL certificate** & domain renewal handling
- **Security patches** as they're released
- **PageSpeed monitoring** with optimizations as needed
- **Form submission testing** monthly (lead form + GorillaDesk)
- **GorillaDesk uptime monitoring.** If your booking link goes down, I'm alerted before your customers are.

2 EMAIL INFRASTRUCTURE

- **Transactional email delivery.** Every contact-form submission is delivered straight to your inbox through a dedicated sender (leads@updates.spraybuzzoff.com) with bot and spam protection already in place.
- **50,000 emails per month included.** Enough headroom for real campaigns (mosquito-season launch, fall tune-ups, holiday promos, follow-ups) without ever touching a Mailchimp or Constant Contact bill. Sent through the same Resend infrastructure your contact form uses.
- **Spam protection & domain reputation.** SPF, DKIM, and DMARC records on your sender domain are monitored and kept current so emails land in the inbox, not the promotions tab.

- **Lead-form bot filtering.** Submissions are scored for spam (disposable email domains, cold-pitch phrases, non-local phone numbers). Real leads land in your main inbox; suspicious ones are quarantined separately.
- **Bounce & unsubscribe handling.** Hard bounces removed automatically. CAN-SPAM-compliant unsubscribe links built into every template.
- **Branded email templates.** Up to 2 custom-designed templates per month in your green-and-gold botanical palette (newsletter, seasonal promo, booking confirmation, post-service thank-you, review request, etc.).

3 LOCAL SEARCH & VISIBILITY

- **Google Business Profile upkeep.** 2 to 4 updates per month (seasonal posts, photos, service highlights, customer wins). Active listings rank higher on "pest control near me" searches — and most of your competitors don't do this.
- **Business-listing audit.** Every month I check your name, address, and phone number are spelled consistently across Google, Yelp, Facebook, Nextdoor, Apple Maps, Bing, Angi, and the BBB. Google penalizes inconsistent listings, and they drift over time as directories auto-update from scraped data.
- **Monthly Search Console report.** Traffic data pulled, summary written (what's ranking, what's slipping, which keywords are growing), delivered to you by the 5th of each month.
- **Keyword tracking.** I watch your position on the searches that bring in calls: "pest control Rancho Cucamonga," "mosquito control Upland," "natural pest control Inland Empire," "exterminator near me," and so on.
- **City landing page upkeep.** Your 8 city pages (Rancho Cucamonga, Upland, Ontario, Claremont, Glendora, San Dimas, Fontana, Pomona) get content refreshes, new local testimonials, and new neighborhood mentions each quarter.
- **On-page tune-ups.** Titles, descriptions, and page structure adjusted based on what's actually converting.
- **AI search optimization.** Your 11ms.txt file kept current so when someone asks ChatGPT or Perplexity "who does plant-based pest control in the Inland Empire," Buzz Off is one of the answers.
- **Structured data upkeep.** The behind-the-scenes code that tells Google about your services, service area, hours, and reviews. Always current.
- **Review snippet maintenance.** New 5-star Google and Yelp reviews pulled into the homepage's structured data each month so the "★★★★★ 5.0" rich result keeps reflecting reality.

4 CONTENT & CONVERSIONS

- **Up to 3 new landing pages per month** — service-area cities, seasonal campaigns, new pest pages, new service offerings.
- **Unlimited copy and design edits to existing pages.**
- **New before-and-after photos and reviews** added as you send them.
- **Seasonal banner and CTA swaps** — mosquito-season launch March 1st, fall pest tune-ups October, holiday gift-card pushes.

- **Blog post or local-guide article per month** ("When does mosquito season start in Rancho Cucamonga," "5 most common pests in Upland homes") — each targets one city + one pest combo, internally linked to the matching city page.

Reasonable usage. Roughly 3 to 5 hours of change work per month is well within scope. Anything beyond that I'll flag ahead of time and quote separately.

5 SUPPORT

- **Priority email and phone/text support** with same-day response on weekdays.
- **Direct line to me** — no ticket queues, no junior handoffs.

WHAT'S NOT INCLUDED

- Major redesigns or full rebuilds (quoted separately)
- Third-party integration setup beyond what's already wired (GorillaDesk, Meta Pixel, Google Analytics)
- Paid ad management (Google Ads, Meta Ads, Yelp Ads)
- Custom development beyond content and SEO work
- Citation submission services beyond Google Business Profile (Yelp, BBB, chamber memberships) — happy to do these as a one-time project

BILLING

Billing runs through **Stripe** on a recurring monthly subscription. Cancel anytime from the billing portal — no questions asked.

First month is prorated to the start of the next calendar month, so whatever you start today you'll only pay the partial month plus the next full one up front.
